ABSTRACT

Some 1,595 documents are listed in this bibliography in an attempt to bring together, from all areas of the Federal Government and throughout the United States, valuable information on the economic development of American Indians and Eskimos. In the document, "economic development" is considered to mean individual and collective efforts (both on and off the reservations) which are directed to the production of tangible income. Sources concerned with information about the natural resources on the reservations have been included where they pertain to specific reservations. The bibliography is divided into 15 specific subject areas, which are in turn indexed by Indian reservation. [Not available in hard copy due to marginal legibility of original document.] (DK)

APPENDIX 260

PREFACE

Material dealing with the economic development of American Indians and Eskimos is scattered throughout the Federal Government and throughout the United States. Not only is this material voluminous, but much of it is not readily available. This bibliography is a unique attempt to bring together in one place as much valuable information as possible on the economic development of the American Indians and Eskimos.

The bibliography includes material reproduced in the United States from 1930 through 1967. Economic development is considered to mean individual and collective efforts on and off the reservations that are directed to the production of tangible income. Sources concerned with information about the natural resources on the reservations have been included where they pertain to specific reservations. Vocational education though a factor in economic development is considered beyond the scope of this bibliography.

The inclusiveness of the bibliography with respect to unpublished material has been contingent upon the cooperation of the Bureau of Indian Affairs' Area Directors. It is our hope that those using the bibliography will find it sufficiently useful to help us gather material that has been overlooked.

Much of the material has neither been published nor cataloged. There maybe those who question this bibliographer's citations. The citations are designed to be as informative as possible considering the nature of the works themselves.

The bibliography is divided into the following subject areas:

1. Arts and Crafts Development
2. Economic Development of Natural Resources Including Appraisals, Surveys and Plans
3. Farming, Ranching, Range Resources, and Related Industries
4. Fish and Wildlife Development
5. Forests and Related Industries
6. Human Resources Including Employment Opportunities

7. Industrial and Commercial Development
8. Irrigation, Dams, and Reclamation Projects
9. Minerals and Mining Including Development Plans and Surveys
10. Overall Economic Development Plans
11. Socio-Economic Studies and Plans
12. Soil and Moisture Conservation Including Water Resources
13. Ten Year Plans
14. Tourism and Recreation Development

Within each subject area the items are listed alphabetically by author. Whenever possible a personal rather than a corporate author has been chosen.

The Reservation Index is also divided into the above-mentioned subject areas when applicable. There has been an effort to index each entry under as many pertinent subject headings as possible, though the entires are listed only once in the main bibliography under the most appropriate subject heading. For Alaska, the policy has been to index the material under the following Bureau of Indian Affairs' Area Field Offices: Anchorage, Bethel, Fairbanks, and Nome. The appendix lists the Alaskan Native Communities under the Field Office which has jurisdiction over them. Material which does not specifically deal with a particular reservation or Bureau of Indian Affairs' Area Field Office is indexed under United States in the same manner as would material be indexed under the reservation or the Bureau of Indian Affairs' Area Field Offices. The numbers in the index refer to the item number in the main section of the bibliography.

Without the valuable assistance of many helpful and patient individuals, this bibliography could never have been compiled. I wish to acknowledge and thank James Officer, Assistant to the Secretary, Department of the Interior, the Bureau of Indian Affairs' Area Directors and their staffs, Theodore Taylor, Joynes Macfarlan, William Pitner, Jesse Goodwin, the late George Schmidt, John Abrahamson, Roger Kingsbury, Robert Pennington, Chizuko Toda, of the Bureau of Indian Affairs, Kay Louka, and James Tanner, of the Economic Development Administration, Frederick Dockstader, Director, Museum of the American Indian, Heye Foundation, and William Byler, Director, Association on American Indians Affairs, Inc.
